

Contact Points - Communication Priorities

Regarding communication, our priority is countries with an advanced social, economic and cultural level as well as economically developing countries. In each country we initially communicate with the **Administration**:

- ✓ Of notable and innovatory businesses, of each country: systematic communication
- ✓ Of the daily and periodical press; the most important media which among other issues also occupy with matters of economy, management, exact science, technology and innovation, sociology, psychology and philosophy. Also, of the magazines specializing in the areas mentioned.
- ✓ Of the most important publishing houses occupying with the above cognitive areas. There is a series of books (summaries on: www.ipcteam.net) that may be reviewed.
- ✓ Of the most remarkable academic and research institutions of each country mainly related to Technology (regardless of direction), Management and Strategy, Marketing and Sales and exact science in general.
- ✓ Of unions and associations of businessmen and executives that run companies and organizations. Moreover, we communicate with the administration of unions and associations related to research and technology (regardless of direction), Management and Strategy, Marketing and Sales.
- ✓ Of the most important governmental and non-governmental organizations and institutions which are socially oriented or promote research and technology. Generally, we communicate with organizations and institutions that would be interested in evaluating and using in practice the factors leading to Intelligence development and improvement of the quality of action.

Furthermore, we address people who can support the promotion of the Concept, because they perceive its perspective.

With kind regards,
